No. 9673-9744

Dated 17-06-2021

To

All SFOs, ASFOs, AOs, Field Assistants, of Field Wing of Soil Fertility Research Institute, Punjab, Lahore.

Subject: **SFRI-GUIDE-VI: SPECIFICATIONS FOR DOCUMENTATION AND QUALITY FORMS TO BE USED IN SFRI'S FIELD WING (2021)**

By the grace of Almighty Allah, who enabled us to write another excellent and much-needed Guide, "SFRI-GUIDE-VI: SPECIFICATIONS FOR DOCUMENTATION AND QUALITY FORMS TO BE USED IN SFRI'S FIELD WING (2021)," which is the most pressing need of the hour and almost completely covers all aspects of documentation for successful field experiments on Farmers fields in the province of Punjab, This compilation of diverse documentations and forms will aid not only field staff, but also all supervisors ASFOs and SFOs who have been found very ineligible to compile information about the previous four seasons' experimentation despite several warnings and explanations. Consider the lethargy of completing work and research in such a desperate manner that no single field officer of the entire SFRI is capable of providing accurate, verifiable, and traceable information. This paperwork will be immediately followed by all staff in the field and will be evaluated during inspections or visits of field wing workers. This will also eliminate all flaws in the formulation of fertilizer recommendations, and all staff members under the administrative control of the Soil Fertility Research Institute, Punjab Lahore, will strictly adhere to the guidelines and formats for preserving all data used in the formulation of fertilizer recommendations. This book sets the stage for soil fertility field wing, which is an essential criterion at the time.

You are required to follow all instructions according to guidelines in order to obtain consistent results with minimal variations for strict enforcement in order to improve the precision with which formulating fertilizer recommendations are made more efficient and authenticated which is our primary goal.

  
18/06/21  
(DR MUHAMMAD AKRAM QAZI)  
Chief Scientist/ Director  
Soil Fertility Research Institute, Punjab,  
Lahore

### **Important Disclaimer**

A reasonable care was taken to make the information in this SFRI-Guide accurate and up-to-date and in accordance with the ISO/IEC 17025:2017 international standard and Standard Operating Procedures (SOP) issued by the Directorate, Soil Fertility Research Institute, Punjab, Lahore from time to time. However, authors would appreciate any comments and suggestions for further improvement of this SFRI-Guide.

Authors accept no liability whatsoever, by reason of negligence or otherwise, arising from any use or release of information in, or referred to in, this guide, or any error, inaccuracy, or omission in the information.

The documentation and quality control forms created in this guide should be verified to ensure that the field wing meets the requirements for field experiments and data collection. All documents and forms must be verified prior to being used for routine office work.

**2021**

■ **FOREWORD**

During a visit to SFRI's field trials, it was noticed that various work approaches and registers were employed to perform field trials and collect yield data. It is worth noting that no effective upkeep of field records for previous experiments was revealed, and field staff was unable to answer to any queries or provide information about previous experiments conducted in the past. A need was identified for the development of a handbook to help laboratories synchronize their work strategies and documentation in accordance with or in comparison to the worldwide standard ISO/IEC 17025:2017 and their Standard Operating Procedures (SOP) with analysis methods.

This SFRI-VI Guide shall be followed in the field wing throughout the province of Punjab, as it will assist in reducing the reporting of inconsistent field results from trials undertaken in different agro ecological zones. Furthermore, it will assist in compiling any information relevant to field trials.

I hope this SFRI-Guide will be beneficial to you, and if you have any suggestions about how to improve it, please share them with me.

Director

**■ ACKNOWLEDGEMENT**

*Dr. Asad Rehman Gillani, Secretary Agriculture, Government of the Punjab deserves special recognition for his inspiration and commitment in enabling us to produce a document harmonizing the analysis work conducted in the field wing of this institute, which is the backbone of soil fertility research and development of fertilizer recommendations for a variety of crops grown in a variety of agro ecological zones and cropping systems.*

**FUTURE WORK STRATEGY OF SFRI**

1. To improve the efficiency of service delivery of all divisional and district labs.
2. In all labs, all laboratory tests will be performed in accordance with uniform standard test methods.
3. To improve the handling of fertilizer samples collected as part of an anti-adulteration campaign for accuracy, repeatability, and reliability.
4. By implementing reforms in the field wing, the institute's original mandate of formulating fertilizer recommendations will be made more efficient and authenticated. InSha Allah

**GUIDELINES FOR DOCUMENTATION AND QUALITY FORMS TO BE USED IN  
THE FIELD WING OF SFRI**

**Introduction**

Documentation is critical in modern management systems, and having techniques and procedures to handle it will almost certainly increase the establishment's quality, as well as its productivity and performance. Proper documentation not only assists you in organizing your notes and data, but it also lends credibility to your work, acknowledges others in your field, and makes it easy to share your study with others. It makes reference to certain, inescapable regulations, such as ISO standards. Document management must be implemented in these instances in order to obtain the desired certification. Generally, an organization's documentation is controlled by four principles: Appropriate, Adequate, Accurate, and Current.

The phrase "document" refers to written or graphic procedures, policies, or instructions. It describes what an organization expects to accomplish and how it intends to accomplish it, as well as guides staff on how to perform certain jobs. In contrast to records, documents exist prior to it happening; they contain guidelines, explanations, and directions on how to operate. Records include information about the activity and, as a result, do not exist until the activity is completed.

- The advantages of keeping organizational records and documentation appropriately should be self-evident.
- To begin, properly kept documentation informs employees of the "official way" to accomplish their assigned responsibilities in order to ensure job quality.
- Furthermore, documentation can be quite beneficial for simplifying complex (and thus error-prone) operations.
- Documentation can be used in conjunction with on-the-job training. It serves as a benchmark for comparing what is necessary against what is actually accomplished. In other words, documentation can be audited to ensure compliance.
- It provides the auditor with excellent objective evidence. Moreover, documentation enables management to assess the quality system's performance..

**SOIL FERTILITY RESEARCH INSTITUTE PUNJAB, LAHORE**

<b><i>SFRI-Guide-VI</i></b>	<b>Specifications for documentation and quality forms to be used in SFRI's field wing</b>	<b>Issue on</b>	<b>21.06.2021</b>	<b>Revision</b>	<b>0</b>
-----------------------------	---	-----------------	-------------------	-----------------	----------

**2021**

### **What is document control?**

- Document control, in its simplest definition, is a collection of activities that assure that documents are created, evaluated, disseminated, and disposed of in a methodical, verifiable manner.
- Organizations must construct a defined procedure for document control that addresses numerous elements of documents, including identification, storage, protection, retrieval, retention, review, approval, disposition, legibility, and change tracking. These practices can assist management in being structured and nimble, especially as the organization grows. Additionally, document control practices are critical for maintaining the integrity and traceability of documents. Further benefits of effective document control in a Quality Management System include the following:
  - Defining, optimizing, and regulating processes
  - Avoiding errors
  - Facilitating and discovering opportunities for training
  - Increasing employee engagement
  - Defining the organization's direction
  - Communicating a commitment to delivering consistent results
  - Revision and Enhancement

This document provides assistance on the development, production, and control of quality forms that are suited to the specific needs of Soil Fertility field staff. Review and improvement with the intention of determining the effectiveness and efficiency of each process and form in achieving its objectives, as well as the development of new best practices and procedures based on data obtained during management activities, would be greatly appreciated. Furthermore, this document is intended to serve as a guideline and may not be comprehensive due to the continuous improvement strategy envisaged. It is a wise proverb.

*An information system may be used, .but not be useful; it may also be useful, but not used. It may even be neither useful nor used. It is ideal if it is both used and useful-Manfred Kochen (1976, p. 150)and*

*Quality means doing the right thing, doing it the right way, doing it right the first time and doing it on time-Townsend (p. 167, 1986)*

Subject: **ALLOCATION OF FIELD TRIALS \_\_\_\_\_ (Season /Year)**

Following is the allocation for experiments to be conducted in -----Division during ----- . All Scientific Officers (Field) /Field Assistants / Field Surveyors are directed to submit their requisition with exact calculation of fertilizer requirements as per program of work (attached) within a week positively. Furthermore site selection should be as per recommendation of the department which has been conveyed in written and verbally to all of you in many times following SFRI Guide IV (How to conduct Soil Fertility Trials on Farmer’s Field).There will be zero tolerance policy regarding site selection layout, fertilizer application, sowing, weed and pest management, data collection. All activities must be recorded in field note book / crop register regularly. PEEDA ACT 2006 will be applied in case of any negligence/ irresponsibility/lack of interest in performing GOVT. duties as assigned.
